

SHRIDHAR KALASGONDA

Engineering Student

shridharkalasgonda@acpce.ac.in | +91 90047 89940 | Thane , Vitawa

CAREER OBJECTIVES

Motivated and enthusiastic Artificial Intelligence Engineering student with strong interests in Full Stack Development, Data Analytics, Machine Learning, and Generative AI. Experienced in developing academic and personal projects using Python, SQL, Streamlit, LangChain, and web technologies. Seeking an internship opportunity to apply technical skills, gain industry exposure, and contribute to innovative projects while continuously learning new technologies.

PROJECTS

Face Recognition Attendance System

- Automated attendance marking via real-time face detection. Generates Excel reports and supports multiple user profiles. Deployed as a Flask web application accessible from any browser.

Cold Email Outreach Tool

- Streamlit app generating hyper-personalized cold emails using Groq's Llama-3 model. Employs ChromaDB vector search to automatically match job descriptions with relevant portfolio links — improving targeting accuracy and recruiter response rates

InsightGPT — Financial News Research Tool

- Privacy-first financial analysis tool built on LangChain and RAG architecture. Processes proprietary documents and surfaces cited, accurate insights through an interactive Streamlit dashboard. Designed for analysts who need depth without data leakage.

NIDS – Network Intrusion Detection System

- Developed a Network Intrusion Detection System (NIDS) using Python and Machine Learning techniques to analyze network traffic and detect malicious activities. The system processes network data, identifies potential security threats, and classifies normal and suspicious behavior, helping improve network security and cyber threat detection.

EDUCATION

B..E. — AI & Data Science

A.C. Patil College of Engineering, Kharghar

- Current CGPA: 8.25

Aug 2023 – May 2027

Higher Secondary (XII)

B.N. Bandodakar College, Thane (PCMB)

- Percentage : 71%

july 2021 – mar 2023

CERTIFICATIONS

- Udemy certified Full-Stack Web Development
- Infosys springboard certified prompt engineering
- Infosys Springboard certified Refactoring ML/DL Algorithms: Techniques & Principles
- MongoDB Overview: Core Concepts and Architecture
- Data Fundamentals By IBM
- claude 101 By ANTHROPIC
- System And Usable Security By NPTEL
- Build a computer vision app with Azure Cognitive Services By Microsoft

SKILLS

- Web Development: HTML, CSS, JavaScript, Flask, Streamlit
- Data Analytics: Pandas, NumPy, Power BI, Tableau, Excel
- AI/ML: Machine Learning, LangChain, ChromaDB, Prompt Engineering, LLMs
- Tools: Git, GitHub, VS Code, Jupyter Notebook
